Recycling Earns Second Bench for Pequannock Library

A collaborative recycling effort involving Pequannock's Environmental Commission, Library, and Stop & Shop has garnered the Township a second new bench at no cost. Under a program sponsored by the Trex Company, groups that collect 500 pounds of plastic shopping bags and similar plastic film can earn a Trex bench made of recycled plastic. Residents deposit their donations in the Library vestibule and Environmental Commission staff weigh and take the material to the Stop & Shop. To learn more about the program and acceptable materials, please see <https://recycle.trex.com/view/educate#materials1>. Please join the recycling effort to reduce plastic waste and help Pequannock earn a third bench!
